Continue

 ad hoc meetings when needed, and communication with each other

START

use time box techniques

documentation - process flow, requirements doc

use class time for the collective tasks - discussion on approach, documentation, etc, project check in, Q&A

 Create space to allow for each to jump off/work indepth to flesh out something
 project plan timeline and document

agree to jump into testing/coding to try when we spend too much time on the theory

STOP

 over thinking -
